25X1X

1. [REDACTED] yellow bands one millimeter wide were painted on aircraft wings and fuselages to identify them as training planes.
2. Training planes were further identified by letters painted on the aircraft's wings and fuselage; these letters and their meanings follow:
 - UA - elementary flight training aircraft
 - UB - advanced flight training aircraft (bombers)
 - UC - advanced flight training aircraft (fighters)
 - US - aircraft used by navigational and telegraphic trainees.
3. The above sets of letters were each followed by a dash and a two-digit number, whose significance I do not know. (A trainee at these schools was assigned to a certain plane and the number on the aircraft was then recorded with his name, as a means of identification.)
4. I noticed that the training aircraft used at Presov Air Force Navigational School¹, besides the usual yellow bands indicating a training ship, also had an insignia on the fin: a circle divided into three wedges of red, white, and blue.
